**SECTION 4**

**FIRST AID MEASURES**

**Inhalation:**
Remove person to fresh air immediately while getting immediate medical attention. Use a bag valve mask or similar device to perform artificial respiration (rescue breathing) if needed.

**Skin:**
Immediately wash skin with soap and plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Seek immediate medical attention.

**Ingestion:**
Never give anything by mouth or induce vomiting to an unconscious or convulsing person. Have victim drink plenty of water for dilution effect. Do NOT induce vomiting without medical advice. Seek immediate medical attention.

**Eye:**
Flush eyes with large amounts of water, occasionally lifting upper and lower lids, until no evidence of chemical remains at least 15 - 20 minutes. Get immediate medical attention.

**Most Important Symptoms and Effects Both Acute and Delayed:**

**Indication of any Immediate Medical Attention and Special Treatment Needed:**
People with chronic respiratory problems should not work with dyestuff powders. If symptoms such as tightness in the chest or asthma occur while handling dyestuff powders, a physician should be consulted as soon as possible. If hypersensitivity is confirmed, all contact with dyestuff powders should cease immediately.

---

**SECTION 5**

**FIRE FIGHTING MEASURES**

**Extinguishing Media:**
Water spray, alcohol resistant foam or dry chemical.

**Unsuitable Extinguishing Media:**
CO₂ and high volume water jet as this may scatter and spread fire.

**Special Protective Equipment and Precautions for Firefighters:**
Firefighters should wear self-contained breathing apparatus and full protective clothing. Use water spray to cool fire exposed containers. Move containers from fire area if you can do so without risk. Avoid inhalation of material or combustion by products. Stay upwind stay out of low areas.

**Specific Hazards Arising from the Chemical:**
Like most materials in powder form, powder may be capable of creating dust explosions. Observe the usual precautionary measures required for chemicals with dust explosive properties. Decomposition can produce toxic and irritating fumes and gases of COx, NOx, and SOx.
